My Coaching Journey

My journey with CliftonStrengths began fifteen years ago, when I first discovered how it could sharpen my self-awareness and improve collaboration with my manager. That experience fueled my passion for helping others unlock their potential and led me to become a strengths coach.

Since then, I've supported countless construction professionals—from interns to C-suite executives—and entire teams in understanding and leveraging their collective talents.

Through team coaching, I've seen groups transform their communication, alignment, and performance, ultimately achieving greater success and fulfillment together.

“Real transformation begins when a team experiences an ‘ah-ha’ moment together, recognizing their collective strengths and potential.

Being a part of that journey is a true honor.”
